EVALUATION SUMMARY

Mission BX-6732

1. Processing and Titling - Performed in the field
2. Physical Condition - Good
3. Hypo Retention - Required rewashing
4. Exposure (based on density) - Light to medium
5. General Comments:
 - A. HT-2 test showed a reading of patch #3 when received.
The mission was rewashed to a patch #1.
 - B. In general, the physical quality of the film is good.
Three to four minus density like streaks or rubs are present on the base throughout. A normal amount of kinks, embedded dirt and emulsion scratches are present intermittently throughout.
